

Campden Instruments Announces Distribution Partnership with SDR Scientific for Australia and New Zealand

Campden Instruments, a leading manufacturer of vibrating microtomes, is pleased to announce a new partnership with SDR Scientific, a renowned life science distributor covering both Australia and New Zealand. This collaboration marks a significant step in expanding Campden's presence and delivering enhanced service to their customers.

Through this partnership, SDR Scientific, based in Sydney, Australia will serve as an official distributor of Campden Instrument's vibrating microtomes, making them more accessible to researchers in Australia and New Zealand. Customers will benefit from improved product availability with faster delivery times, and superior local technical support.

"SDR Scientific shares our commitment to high-quality products, and customer satisfaction," said Dr Ian Davies, Managing Director of Campden. "This partnership enables us to better serve researchers in Australia and New Zealand, by providing them a reliable contact for great service in their time zone and continent."

SDR Scientific brings extensive experience in the life science sector making them an ideal partner for Campden. "We are excited to begin distributing Campden Vibratomes," said Simon Rushworth, Managing Director of SDR Scientific. "Their high-quality vibratomes align perfectly with our commitment to providing superior solutions for our customers. Together, we look forward to creating new opportunities for researchers here in Australia and New Zealand."

About Campden Instruments

Campden Instruments, a part of Lafayette Instrument Group is known for turn-key solutions for translational life science research. With a commitment to excellence and customer satisfaction, Campden Instruments continues to drive innovation in vibrating microtomes and deliver industry-leading solutions for animal behaviour for scientists across the globe.

About SDR Scientific

SDR Scientific is a leading distributor of quality scientific and clinical hardware, software and consumables to scientific research, medical and industrial customers in Australia and New Zealand. Known for its strong customer relationships and extensive distribution network, SDR Scientific is dedicated to providing the highest-quality equipment and service available.
